2025

**COMPANY
PROFILE**

METALCONTROL SRL

MECHANICAL WORKING SINCE 1989

A solid family-run business specializing in turning, milling, and much more. All company activities are supported by an IT management system: from warehouse control and production scheduling to process control and final testing.

MULTIPLE MACHINING OPERATIONS

We perform a wide range of operations:

BORING | GEAR CUTTING | MILLING | GRINDING
TURNING | DEEP DRILLING | TREATMENTS

MATERIALS PROCESSED

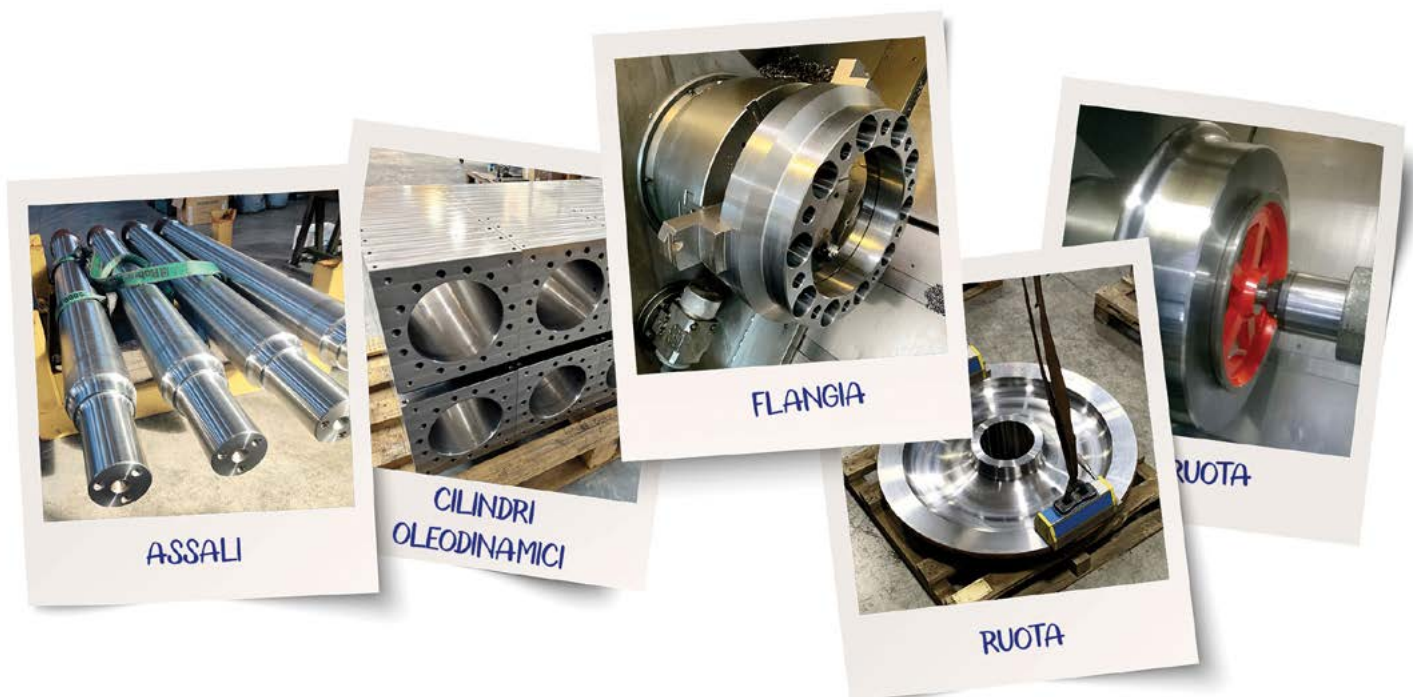

- All types of steel
- Brass
- Bronze
- Aluminium
- Plastics
- Stainless and ferritic stainless steels

PROCESSING SECTORS

The handling and lifting sectors include:

- RAILWAY SECTOR
- HYDRAULIC SECTOR

We produce all components for port cranes and stackers. We handle machining of mechanical parts of all sizes, including the supply of small and medium assembled components.

Applications in the lifting sector

LIFTING HOOKS | PULLEYS AND SHEAVES | WINCHES | AXLES | HUBS
RAILWAY WHEELS | BUSHINGS | MOUNTING EARS

Hydraulic components in the lifting sectors

HYDRAULIC CYLINDERS | HYDRAULIC PISTONS | CYLINDER HEADS
HYDRAULIC SYSTEMS | HYDRAULIC CYLINDER | HYDRAULIC VALVES

AGRICULTURAL SECTOR

Our components for vacuum pumps and related parts are designed to ensure efficiency, durability, and top performance even under the toughest conditions.

- Production of vacuum pump components
- Optional accessories for slurry tanks (slurry nozzles, valves, flow diverter taps)
- Various components (rotors, sheet metal parts, flanges)

MEASUREMENT SECTOR

Components for the production and distribution of weighing systems and industrial scales, calibration instruments, and accessories designed to optimize weight control and improve productivity.

FOOD INDUSTRY SECTOR

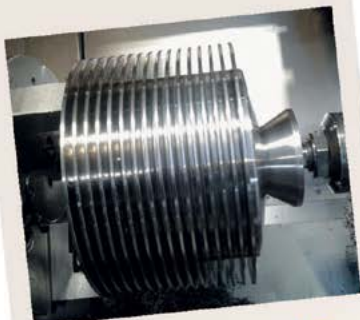

We offer safe and reliable solutions for the food industry, meeting hygiene, resistance, and durability standards as required by regulations. Our product range includes:

- Components for high-performance food pumps
- Components for production lines
- Parts in stainless steel and food-grade plastic

All designed to ensure maximum efficiency and safety.

COPERCHIO POMPA

CORPO IMPASTATRICE

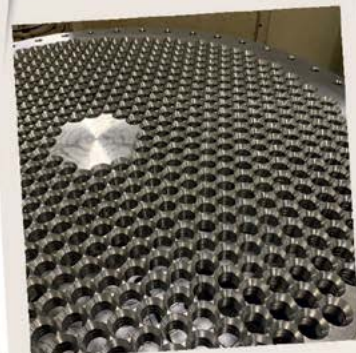

CULATTA FORNO

DISCO FORATO

RAGGERA

DISCO SEPARATORE

CERAMIC SECTOR

In the ceramic sector, each component must ensure strength, reliability, and durability. Metalcontrol produces custom mechanical parts such as pump bodies, filters, and hubs, designed for seamless integration into production lines and to support high performance even under complex conditions.

WOOD SECTOR

In woodworking, precision and strength are essential to ensure efficiency and continuity in production processes. Metalcontrol manufactures debarking rollers and other high-performance mechanical parts designed for durability, reliability, and perfect integration with woodworking machinery.

METROLOGICAL LABORATORY

Constant control of quality standards makes Metalcontrol s.r.l. at the forefront both for the measurement methods adopted and applied and for the high-precision instrumentation.

WIDE RANGE OF INSTRUMENTS

- Three-dimensional **Mitutoyo Crysta Apex**
- **RENISHAW PH10** electronic probe
- **Mitutoyo Sj 400** roughness tester
- Digital trolley with granite backing
- **Rockwell and Brinnell** digital hardness tester
- **Mitutoyo Contraracer C3200** Profilometer

The calibration service of all the measuring instruments operating in the company with sample instruments such as grade 0 parallel flat blocks, reference plates for roughness and hardness checks, sample spheres, etc.

COMPLETE CHAIN

Metalcontrol acts as an active partner for every production need and supports the customer at every stage; from design to delivery using a team of specialists able to satisfy every need with a complete service.

DESIGN

We provide precise, tailor-made assistance to optimize existing projects or develop custom solutions from scratch.

WAREHOUSE

Our extensive material warehouse ensures optimal processing times and uninterrupted production.

ASSEMBLY

Dedicated workspaces for assembling each mechanical component, guaranteeing a fully integrated service.

PAINTING

Every component is carefully finished and painted to ensure durability and optimal mechanical performance.

DELIVERY

We offer turnkey delivery across Europe, ensuring punctuality through our extensive logistics network.

ASSISTANCE

Comprehensive support throughout the product's lifecycle, from installation to maintenance.

CERTIFICATIONS & SUSTAINABILITY

At Metalcontrol, quality and sustainability guide our operations. Certified excellence, safety, and environmental responsibility drive us to reduce impact while ensuring top-tier product standards.

ISO 9001 CERTIFICATE

COMPANY CODE OF ETHICS

LEGALITY RATING

SUSTAINABILITY REPORT

BUSINESS GOALS

- Greater involvement of staff in order to make the working process more fluid
- Specialized Technical Office for the creation of new products
- Work in compliance with mandatory regulations
- Prevent any form of impact on the health of workers
- Reduce risks through the adoption of appropriate management and operational measures with particular attention to risks related to the workplace
- Customer satisfaction with production quality, assistance and support

“Our company sets itself the goal of making the most of the products that is able to create, therefore it imposes various regulations for processing and production. All this with the aim of providing each customer with products guaranteed over time in terms of effectiveness and construction quality. Last but not least, all of this is done in the most environmentally friendly way possible, firstly by using renewable energy at its best and secondly by investing on the production area to reduce the environmental impact of each project.”

Federica Marmioli
 GENERAL MANAGER
